

Send a Comment to the Federal Energy Regulatory Commission (FERC):

Follow these steps:

1) Fill out the form:

<https://ferconline.ferc.gov/QuickComment.aspx>

2) This will generate an email with a link to a comment form. In the search field enter the docket number:

Enter Docket Number: P-12569-014

and then select

“Request for Stay of the Commencement and Completion of Construction Deadlines under P-12569”

3) Enter a comment up to 6000 characters

Customize your comments but here are some key points:

- I request that you terminate the license for the Enloe Hydroelectric Project and deny the request for stay.
- As a ratepayer of Okanogan PUD, granting a stay and allowing the PUD to retain their license will cause me harm and is not in the public interest.
- Given new evidence regarding fish passage [include any personal knowledge you have— i.e. if you have personally witnessed fish] to the base of Enloe Dam and uncertainty regarding the design of the project [include anything you have heard in PUD meetings], the Commission should deny this request for stay and terminate the license.
- The PUD has not proceeded with the project development in a diligent manner, leading to repeated requests for extensions.
- The inability of the PUD to commence construction is entirely due to its own inaction and inability to develop a plan to design, construct, and operate the project.
